Diamond Sear Cooking Grids *

- Diamond Sear cooking grids promote more optimal heat transfer to food. Their shape with angled sides improves the flow of heat to the cooking surface.
- Diamond Sear cooking grids are easier to cook on as foods stick less to the cooking surface than round cooking grids.
- Diamond Sear cooking grids have more contact surface than round grids. This provides more points of contact that help to sear your meat better and faster.
- More efficient heat transfer and quicker cooking result in less use of gas.

* U.S. Patent No.: D857,453 & D862,984

Advanced Heat Distribution System

Zone Flavour Grids

- Heavy gauge stainless steel flavour grids minimize flare ups, provide quick and even heat distribution, and flavour food by vaporizing juices.
- Designed to provide distributed heat to the cooking grids; they don't retain or block heat from rising.
- Integrated Zone Separators create zones for cooking varied foods at different temperatures.
- Easy to clean and maintain.
- Simple to remove when rotisserie cooking (for largest rotisserie area).

Largest Cooking Area

Fire Magic® grills provide more cooking area than other grills and more kWh per square cm of cooking surface.

Cast Stainless Steel "E" Burners

- 6.4mm thick cast stainless steel burners weighing up to 5.4kg each.
- Precision porting - cast to be evenly spaced on each burner.
- An internal baffling system and carry over slots designed for ease of lighting, and balancing flame and heat; to provide well distributed heat, on high or low in each burner.
